

Mirat Can Bayrak (+90 0506 678 85 05)

Skills

I am well trained about **Python**, and its framework **Django**. I am also good at **XHTML/CSS**, **Javascript** and **JQuery** applications.

I'm also quite experinced about **TDD** and **BDD** methologies, and I can build automated behaviour driven frontend tests by using **Selenium HQ** and **lettuce**.

Find me at GitHub

I'm using Github actively. To see my code repositories go to:

Experiences

Netagenda Software Developer, Tester, Test Automation Developer

Netagenda is a proven market place where people can publish, compare and book unique services throughout Switzerland. At this project first I was responsible with backend development of Netagenda. After that, I've dealt with manual testing, and automation of frontend tests.

Reachpod Software Developer

I was responsible with development of backend of reachpod.com Reachpod is social media management platform that you can manage different social media accounts from one simple dashboard. When I was working there I gained experience about API's of popular social media networks like Facebook, Instagram, Twitter etc.

Markafoni Software Developer

I was responsible for maintaining of backend of Markafoni.com. It's a very traffic heavy website with 20 million unique visitors and 340 million page views in a month. I was trained about performance and **concurrency**. I learnt to use distributed task queue (**Celery**, **RabbitMQ**), and key-value database (**Redis** and **MongoDB**) technologies.

Buzul Teknoloji Software Developer

I was responsible for maintaining of ValMod software. It was a Django application which is used for validation of hospital receipts. That software was being used about 5 regions on England.

Opsinova Software Developer

I was responsible for software engineering of lookremix.com. Backend was written in Django. On frontend I built a kind of image processing tool by using [Javascript](#) and [Backbone.js](#).

Mobil8 (Assistant, Software Programmer, Content Manager / sept. 2007 - feb.2009),

At the beginning, all work had been maintained manually as a graphic artist, then, with the assistance of Python knowledge, images were edited and solutions to automation process of content delivery were created.

Artistanbulpr (Web Designer & Developer / may-agust 2007)

By using open source graphic tools, company website was designed and promotion videos were prepared.

Istanbul Municipality (Graphic Artist / july-sept. 2007)

During the time that I was a student of Anadolu University graduate program for painting, I worked as an oil painting artist for municipality. The aim was colouring dull walls all around the city.

Current Projects

resm.in

A social QA website that people answer your questions by taking photos.

bavulanekeysam

A weekend project. Simple tool for making backpacking lists when going vacations. Used [Google App Engine](#) when building.

linkfloyd.com

Social link bookmarking website like [reddit](#).

<http://bilsin.com> (closed)

This is an announcement and classified advertising service for social groups. It's powered by [Django](#). Coding, designing, content management and all necessary developments have been maintained by myself.
